

I hereby certify that the Lots 1 through 8 represented on this plat of survey are on lands Interim Conveyed to Choggiung, Limited, by Interim Conveyance Nos. 239 issued by the United States of America; said lots also fulfill all entitlements under the provisions of ANCSA 14(c) as requested by Choggiung, Limited, Resolution Agreement No. 90-3, and the Igushik ANCSA 14(c) Map of Boundaries approved March 19, 1990.

  
President, Cragg Limited

I, Jon L. Kehler, Cadastral Surveyor, HEREBY CERTIFY upon honor that I have executed the ANCSA 14(c) Survey depicted on this plat, sheets 1 - 4, in conformity with the Special Instructions approved May 18, 1990, the principles of survey described in the Manual of Surveying Instructions, 1973, and in the specific manner described on this plat.

This plat contains the entire survey record.

U.S. Survey No. 7799 was surveyed by Paul L. Moss, Cadastral Surveyor, in 1988.

This survey was executed by Jon L. Kehler, Cadastral Surveyor, June 25 through July 5, 1990, in accordance with the principals set forth in the Manual of Surveying Instructions, 1973, Special Instructions approved May 18, 1990, the Igushik ANCSA 14(c) Map of Boundaries approved March 19, 1990, and Assignment Instructions dated May 31, 1990.

Field assistant was:

David M. Klein, Student Trainee (LS)

Area: 7.23 Acres

The azimuth was obtained from direct observations of the sun, using the hour angle method, and refers to the true meridian.

The geographic position of corner 1, ANCSA 14(c) Lot 1, as determined from a tie to U.S. Survey No. 7799, is:

Latitude: 58° 42' 06.80" North  
Longitude: 158° 52' 28.16" West

The magnetic declination was taken from U.S. Geological Survey quadrangle map "NUSHAGAK BAY (C-3)," Alaska, 1950 edition, with limited revisions in 1981.

This survey is situated on the westerly shore of Nushagak Bay, approximately 2 to 3 miles southeasterly of the mouth of the Igushik River and approximately 13 1/2 miles southwesterly from the village of Ekuk, Alaska.

The land is generally level, covered with native grasses.

The term DEEP-1 magnet refers to a magnetic marker composed of strontium encased in a color coded plastic container. The units are 1 inch diameter and 2 1/2 inches long.

Access to the survey was by fixed wing aircraft.
